AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-13. (Canceled)

14. (Currently Amended) A disposable absorbent article comprising:
a containment assembly, defining a containment assembly area, said containment assembly comprising a topsheet, a backsheet and an absorbent core disposed between the topsheet and the backsheet; and
a pair of side panels joined to the containment assembly and defining side panel areas, each side panel comprising a securement member wherein the backsheet comprising comprises a plastic film and a nonwoven web, said plastic film having an inner surface and an outer surface, wherein said plastic film is disposed only in said containment assembly area, wherein said nonwoven web is joined to the outer surface of said plastic film such that the nonwoven web covers the entire outer surface of the plastic film and is disposed on said containment assembly area and said side panel areas, positioned at the outermost of the absorbent article, and for covering at least a portion of the outermost portion of the absorbent article,

wherein the nonwoven web is a spunbonded nonwoven web comprising spunbonded bi-component plastic fibers.

15. (Canceled)
16. (Currently Amended) The disposable absorbent article of Claim 14 wherein the bi-component fibers ~~contains~~ comprise a polyethylene and a polypropylene.

Customer No. 27752

17. (Currently Amended) The disposable absorbent article of Claim 16 wherein the bi-component fibers ~~has~~ have a core made of the polypropylene and a sheath made of the polyethylene.
18. (Currently Amended) The disposable absorbent article of Claim 17 wherein the bi-component fibers ~~has~~ have from about 55% to about 95% by weight of the polyethylene.
19. (Original) The disposable absorbent article of Claim 14 wherein the spunbonded nonwoven web is placed in the disposable absorbent article so that the fiber direction of the spunbonded bi-component plastic fibers is aligned with the longitudinal direction of the disposable absorbent article.
20. (Original) The disposable absorbent article of Claim 19 wherein the spunbonded nonwoven web has a tensile strength of at least 80 gf/cm in the traverse direction of the disposable absorbent article.
21. (Original) The disposable absorbent article of Claim 14 wherein the nonwoven web has a hand value of Koshi of less than about 16.0, a hand value of Shari of from about 0.5 to about 9.5, and a hand value of Fukurami of less than about 5.0.
22. (Original) The disposable absorbent article of Claim 21 wherein the nonwoven web has a fuzz level of less than about 1.0mg/cm².
